Directions For Care and Planting

If you wish to plant your empty wells, logs, pots, etc. with our "Desert Sunrise Assortment" first line article with the liner that we provide for that purpose. Next fill the log three quarters full with soil mixture of ½ garden soil and ½ adobe or clay. Now place log on bench with the end toward you and with a flat stick press a hole in the farthest end and put a rosette or echeveria in and in the middle place a tall cacti or aloe and continue to press dirt up against each plant as you place them in. Continue on with more plants until you get the entire log filled. Next press a roll of damp spagnum moss around edges of the plants to hold securely in place. Now you are ready to spray entire piece and put it on display. Spray thoroughly once or twice a week or dip entire piece in a bucket of water once a week. Place in a sunny and airy location if possible and they stay pretty for several months. Tell your customers that when the plants begin to out-grow their log or well they may remove them and put them in pots or out of doors as they wish. The logs or pots, stumps, etc. are also very pretty used as a holder for a vase of trailing ivy or other plants. All articles are exactly as pictured and are all made by hand to last indefinitely. Absolutely no glue or stain is used on the cactus wood. All articles are buffed smooth and clean and all that is needed to keep them pretty is an occasional spraying with water.
